SAFE, SURE & SIMPLE SOLUTIONS.

THINK SAFETY.
THINK PERFORMANCE.
THINK JETSTREAM.
MONTI Tools Inc. is the North American corporate office of MONTI - Werkzeuge GmbH, developers and manufacturers of patented tools for professional surface preparation. MONTI Tools was opened in 2004 to meet the level of demand in the US market. Now the Houston, Texas based headquarters control the group's activities across the whole of North America and Canada. Maintaining complete inventory ready for immediate shipment, MONTI Tools Inc. stands prepared to support your surface preparation needs.

**PRODUCT**

The Bristle Blaster® technology (Tensioned Wire Blasting), introduced in 2007, is an innovation in surface preparation. Designed for professional industrial use, the Bristle Blaster® tool is able to remove corrosion, mill scale, and coatings from pitted surfaces and hard-to-reach areas. It is the only hand-held tool capable of generating surface preparation grades comparable to SSPC-SP10/NACE No.2 up to SSPC-SP5/NACE No.1 and a surface roughness profile of up to 4.7 mils (120μm Rz), results equal to abrasive blasting processes.

Typical applications of the tools include spot repairs, weld seam preparation and corrosion treatment. Advantages of portability, safety and environmental performance make the Bristle Blaster® versatile throughout a number of industrial sectors including offshore and shipbuilding, pipeline and steel construction, hydraulic engineering, petrochemical and coating applications.

MIXPAC™ Mixcoat
For 2-K Coatings: Fast & Flexible

For 2-component coating material
• Reliable mixing
• Safe process time
• Light and easy to handle
• Minimal waste
• Exact mixing ratio
• Minimal chemical exposure
• Minimal odor
• Simple setup and cleanup

Since 2002, Sand Express has been producing and supplying high quality BLAST SAND and COAL SLAG BLASTING ABRASIVES for contractors in the protective and marine coatings industry. With production facilities located in the southwest (TX, KS, MO) and southeast (MS) regions, our line of abrasives are distributed throughout these regions as well as CO, NM, OK, AR, AL, and FL making us a top supplier of dry, screened sands. Our Dakota Black Coal Slag is a steady, easy-cutting finished slag product making it the contractors’ product of choice. Our superior service and strong commitment to high quality, consistent products are unmatched in the industry.

Since your productivity and profitability are directly related to our performance, our mission is to meet your blasting abrasive needs with competitive pricing to keep your projects on schedule and budget...every time!

The Sand Express abrasive product line features BLAST SAND and DAKOTA BLACK COAL SLAG that are packaged in various bag sizes as well as bulk systems that provide flexible and efficient contractor solutions.

• BLAST SAND products are uniformly sized to eliminate clogging.
• BLAST SAND is available in standard grades: Coarse, Medium, and Fine as well as custom blends packaged in 50 lb., 80 lb., 100 lb. and 3,000 lb. bulk bags.
• DAKOTA BLACK COAL SLAG is available in Medium, Fine, and Extra Fine grades packaged in 50 lb., 80 lb., 100 lb. and 3,000 lb. bulk bags in the Southwest Region only.
• BLAST SAND is available in 4,000 lb. bulk bags for offshore use.
• BLAST SAND and DAKOTA BLACK COAL SLAG are available in 25-ton Pneumatic Bulk Trailers.
• Dust Inhibitor can be added to our abrasives to reduce on site respirable dust by up to 70% and visible dust by 50%.

„Our promise to the protective coatings industry is high-quality, consistent abrasives backed by exceptional service, accuracy and timely delivery—That’s the competitive advantage gained with SAND EXPRESS!”

GREEN DIAMOND is the chosen one for high quality specialty sand.

Angular shape provides superior blasting efficiency and produces an excellent surface profile.

- Contains less than 0.1% free silica
- Moisture Free - Will not pack or absorb moisture
- Non-metallic and chemically inert
- Mohs Hardness: 7
- CARB Certified (1636, 1650, 2050 & 30x50)
- QPL 22262 (SH) • MIL-B-22262 (SH)
- Heavy Metals: Meets TCLP • Meets AB1
- Custom blending upon request
- Recyclable • Manufactured in U.S.A.

NSF Certified
Water Soluble
Won’t Damage Substrate
Non-hazardous

PureBlast™ is effective in removing chlorides and tough contaminants. It is non-hazardous, water soluble and environmentally safe. Sodium bicarbonate’s softness allows for surface prep that won’t damage the substrates. PureBlast™ sodium bicarbonate is the preferred Blast Media for many sensitive applications. Call Tronox, the leading manufacturer of sodium bicarbonate, for more information or how to order PureBlast™ Sodium Bicarbonate Blast Media Grade.
